PROFESSIONAL SUMMARY

PHP Developer with 5 years of experience building and maintaining web applications across Laravel, CodeIgniter, and full-stack JavaScript environments. Experienced in developing e-commerce platforms, accounting-related systems, and product-based software, including a full CRM system, ERP, and billing platforms built end-to-end. Currently building backend systems for multiple e-commerce sites and integrating React front ends with Node.js services. Skilled in API integration, database design, and translating client requirements into scalable, production-ready software.

TECHNICAL SKILLS

Backend: PHP, Laravel 10, CodeIgniter 3 & 4, Node.js, RESTful API Design & Integration

Frontend: React, JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap 4 & 5

Database: MySQL — schema design, optimization, query tuning

Other: AI-assisted / vibe-coding workflows (1 year, React & Node.js development), requirement analysis, e-commerce / accounting / product-based software development, third-party API integration

PROFESSIONAL EXPERIENCE

Software Developer — Icore Software Technologies *Jun 2025 – Present*

- Work as a Software Developer building backend systems using Laravel and CodeIgniter for accounting-related applications and product-based software.
- Develop backend systems for multiple e-commerce websites, covering product catalogs, checkout, order management, and billing logic tailored to each client's business needs.
- Build website front ends using React and connect them to Node.js backend services using AI-assisted (vibe-coding) development workflows — 1 year of hands-on experience applying this approach to real production features.
- Develop and support REST APIs to power a companion mobile app, enabling data exchange between the mobile client and backend systems.

PHP Developer — Rk Creators *Sep 2022 – Jun 2025*

- Built dynamic, secure, high-performance web applications using CodeIgniter 3, tailored to individual client requirements.
- Designed and delivered custom software solutions including a wholesale & retail jewelry management system, a full CRM software platform built end-to-end, an ERP system, and a billing platform.
- Gathered and analyzed client requirements directly, translating business needs into technical specifications and working solutions.

- Designed, optimized, and managed MySQL databases to support application performance and data integrity.
- Integrated third-party APIs and tools to extend application functionality and streamline business processes.
- Diagnosed and resolved issues in existing applications, improving reliability and maintainability.

Web Developer — Mexerv *Nov 2021 – Sep 2022*

- Built responsive, visually polished websites using HTML, CSS, and Bootstrap.
- Implemented interactive front-end features with JavaScript to improve user engagement.
- Developed mobile-first layouts, ensuring a consistent experience across devices and screen sizes.

Freelance Web Developer — Friendship Community Care *Sep 2022*

- Independently managed and delivered a website project end-to-end, from concept through deployment.
- Built a responsive front end using HTML, CSS, and Bootstrap as the sole developer on the project.
