PROFESSIONAL SUMMARY

Result-driven Software Developer with 4.5+ years of hands-on experience designing, engineering, and maintaining backend systems and web applications using PHP frameworks (Laravel 10, CodeIgniter 3 & 4) and MySQL databases. Proven track record in developing enterprise software solutions including CRM platforms, ERP systems, billing software, and custom e-commerce engines. Adept at leveraging modern AI-assisted workflows to rapidly prototype, integrate API endpoints, and deliver production-ready software.

TECHNICAL SKILLS

Backend Development: PHP, Laravel 10, CodeIgniter 3 & 4, RESTful API Design & Integration

Database & Optimization: MySQL, Schema Design, Query Optimization, Indexing, Performance Tuning

Frontend & Web UI: React, JavaScript (ES6+), jQuery, AJAX, HTML5, CSS3, Bootstrap 4/5

Workflows & Tools: AI-Assisted Workflows (React & Service Integration), Requirements Analysis, Git, Postman

PROFESSIONAL EXPERIENCE

Software Developer — Icore Software Technologies *Jun 2025 – Present*

- Architect and develop core backend logic using Laravel 10 and CodeIgniter for accounting software and product-based platforms.
- Engineered backend modules for e-commerce clients, managing product catalogs, checkout flows, custom billing logic, and order workflows.
- Utilize AI-assisted development workflows to accelerate feature generation, integrate React frontend UI components, and connect services into active production.
- Develop and support REST APIs powering companion mobile applications and facilitating external system communication.

Software Developer (PHP) — Rk Creators *Sep 2022 – Jun 2025*

- Designed, built, and deployed custom web software including a full-featured CRM system, ERP software, and a billing platform using CodeIgniter 3.
- Engineered a custom wholesale & retail jewelry management system, standardizing real-time inventory tracking and auditing processes.
- Gathered client business requirements directly and converted technical specifications into relational database schemas.
- Optimized complex MySQL queries and database structures to ensure smooth performance under high transaction volumes.

- Integrated third-party APIs (payment gateways, logistics tools, notification services) to enhance platform functionality.

Web Developer — Mexerv *Nov 2021 – Sep 2022*

- Developed mobile-first, responsive user interfaces and modular website layouts using HTML, CSS, and Bootstrap.
- Implemented dynamic client-side functionality using JavaScript and AJAX to enhance user interaction.

Freelance Web Developer — Friendship Community Care *Sep 2022*

- Independently managed and deployed a client web project from initial layout creation through final deployment.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering
Ambal Professional Group of Institutions, Palladam | CGPA: 7.76/10 | 2017 – 2021

Higher Secondary Education (HSC)
NCP MPL HR SEC School, Dharapuram | Percentage: 76% | 2016 – 2017
